

Harnessing the power of renewables

# Process for Connection

## STEP ONE:

Member contacts Decatur County REMC to discuss installing solar. Items to share with the co-op are the type of unit, size, and generator use, just to name a few. This step should take place at least two weeks before the initial energizing.

## STEP TWO:

Member completes *Application for Distributed Generation* and returns to Decatur County REMC. Decatur County REMC Engineering Department approves application.

## STEP THREE:

Member notifies Decatur County REMC they are ready to energize and schedules appointment. Decatur County REMC completes site verification, exchanges meter with a bi-directional meter, tests for feedback, and invoices member for meter charge.

## STEP FOUR:

Member signs *Agreement for Interconnection* and returns with *Insurance Policy Declarations* showing general liability coverage of \$300,000.

## STEP FIVE:

Member receives first net-billing statement.
